In 2016 we saw a dramatic change in the regulations governing the sale of rodenticides (rat bait). The ThinkWildlife group defined that clear amateur and professional rodenticide pack labelling should be introduced and certification required for sale was needed.

> As of 1st March 2018 all amateur packs will reduce in size from 1.5kg down to 300g. The active ingredient shall also be reduced from 50 ppm down to 30 ppm. Professional packs will start from 3 kg and the active ingredient ratio shall stay the same.

All sales of professional packs will need a farm assurance scheme number or a CRRU approved certificate.

## **FORKLIFT THOROUGH EXAMINATIONS**

We have certified CFTS trained staff that can offer examinations on any make of telescopic handler.

Under UK law, EVERY fork lift truck must have a valid Thorough Examination certificate. CFTS sets the national standard for this vital, regular inspection.

To provide clarity, the industry's major trade associations worked together in consultation with the Health and Safety executive - to give clear, definitive procedures and consistent high standards for a safe and genuine Thorough **Examination. The result is Consolidated Fork Truck Services (CFTS): the** national accreditation scheme for Thorough Examination, specifically for companies who service forklift trucks.

The distinctive CFTS mark: it's your guarantee that a Thorough Examination is full and valid under law, and will be carried out by a fully trained engineer in accordance with strict quality procedures.

To book your examination please contact Mick Ward: mick.ward@robertdwebster.co.uk / 01430 430624

### Most non-CFTS inspections meet LOLER 98 requirements

Only a CFTS accredited Thorough Examination is guaranteed to check the whole Manitou machine... so you know it's really safe to use and you're covered for both LOLER 98 and PUWER 98 regulations.

#### They will check...

#### **CHAINS\***

Extension chain failure is critical, but the wear, elongation or corrosion that can cause it are gradual and tricky to spot: a change of just 2% is a cause for concern. Chains must be checked carefully, in at least three places, along with anchors and pulleys.

#### \*MT1840 & MRT only.

#### **BOOM**

The boom must be inspected throughout its full range of extension and movement. to ensure the smooth, safe operation and structural integrity.

Boom wear pad adjustment should also be checked.

#### CONTROLS

potential failure through damage, corrosion or wear.

#### **LOAD CHARTS &** SERIAL NUMBER PLATE

Clear rating information is absolutely critical to the safe operation of any telescopic for lift. Load charts should be available for all attachments used.

the tilt must move in an even controlled way and the compensation system must keep the forks level in the full range of travel. It mist also be checked for damage, scoring and circuit relief valve operation.

**TILT MECHANISM** 

To enable safe operation,

### **TILT LINKAGE**

**CARRIAGE &** 

The carriage and tilt linkage should be free from distortion and cracking. All linkage and bushes should be checked for wear and the security of pins confirmed.

#### **FORKS** Fork arms are subject to

#### **SEAT & MOUNTING**

The seat mounting must be absolutely secure. The operation of the seat suspension system must also be checked for correct operation. Seat belts will also be checked.

#### **CHASSIS**

The chassis is inspected for cracking and signs of damage, with particular attention paid to welds and ram mountings.

#### **SAFETY SYSTEMS**

The correct callibration and operation of all safety systems are checked and where appropriate diagnostic codes are recovered with PAD.

### CAB

The cab structure and ROPS and FOPS protection are checked.

#### COUNTERWEIGHT

The counterweight can weigh two tonnes or more and is required for truck stability. All fastenings must be secure and undamaged.

### ENGINE & TRANSMISSION

The prime mover and the transmission are inspected. As well as the engine the exhaust system is also checked.

#### **BRAKES**

A CFTS examination covers both the service and parking brakes - checking all hydraulics, mountings, pedals, levers, linkages and adjustment to check brakes operate exactly as per specifications. Trailer braking valve operation will also be checked if fitted.

#### **WHEELS & TYRES**

Wheel and tyre assemblies will be checked to ensure they are fixed securely, and free from damage or excessive wear. Tyres will be checked for the correct specification as detailed in the operator's manual.

## **COMPETITION WINNER**

**Cover image taken by Rob Campey** 

To celebrate the Farmers Guardian's #FARM24 event we held a photo competition where you submitted your best photos of the New Holland machinery we supplied you, working hard, helping produce the best of British food, the theme of this years FG celebration.

We had so many wonderful entries it was so hard for us to narrow it down to just five, so we chose SIX. Then our facebook followers chose the winner, and it was Rob Campey with our beautiful cover shot.

## WE ARE STILL MOVING!

From Kilham to Cranswick

We were asked by the council to remove our sign from outside the new depot site due to health and safety reasons...

but we are definitely still moving!

We don't just sell tractors and combines. At each of our depots is a country store with everything from towing equipment to garden tools to domestic cleaners and lots more... come have a look around!
